Each stone went to a universe

The magic stone floated through the universe
And drifted to earth

The stone made magic, and made ancient spells work
It help the humans in the Creeper-Human war

Since there was no guardian of the universe yet the stone was not protected

It was found by a wizard who put it in a sword
While enchanting it with spells. With the magic orb in the sword

Power and energy bombs are created by focused Energy being controlled by the user and then released into a bomb by cutting the atoms, similar to a nuclear bomb except without nuclear energy and instead created with surrounding energy, this is the same for flying

The advanced superhero suites help collect more energy and aid protection from blasts, the iron suit enables higher energy level blasts along with protection. The Cap armor suit is more durable than the original suit. Like the original it's bullet proof but this suit has more stamina and can charge blasts like the iron suit. This is the same with new models of Figs ninja suit.

Magic is different as magic spells generate power of their own. Magic exists because of the magic stone, thus enabling enchantments and spells to work and create power. Power varies through spells and sources, and the beholder of the magic.

Super modes and legendary mode are physical evolutions of the body as the user pushes its body beyond its regular state to a greater form. This can be accomplished through energy, magic and physical/mental training to a point where the body adapts and evolves.

It's common in Hero's and villains in Forms such as super, legendary, and ultra.
