Season 21: Flashback from the Past

After I was burned alive by lava and stabbed in the heart
I didn't think I would make it, but somehow, somehow
I managed to come up, scarred and severely weakened

I used all my power to try to escape but I slowly faded
I was about to pass out and die before a Mooshroom found me

The Mooshroom let me go on its back
I didn't know where it was going but it was my only option

I was brought to a lab where a robotic wolf fella
Greater me. He acknowledged my power and wanted to help me out
He acknowledged I wouldn't make it much longer
and that robotic enhancements couldn't save my burned organs
He said he could hook me up to a super computer and make me stronger than ever

However he said this technology wasn't ready yet
and since I wouldn't make it much longer I would need to be frozen
I accepted as I had no other options

One day I was awoken by an earthquake but the lab was empty
I realized it had been over a thousand years since I was frozen
I guess the wolf fella and his crew perished at some point

I was destined to find this super computer as I was still very weakened
and as I searched the lab I found it, the super computer
The Wolf man left it just for me
I hooked myself up and knowledge and power ran through me
All I needed now was my sword to regain my full power
